

We agree- we have a great community here at Alta-Aurelia. No one should be "assuming malicious intent" well before any criminal mischief has even been established. But we believe we have enough evidence to reasonably suspect criminal behavior from someone, perhaps an outsider. Did you read the attachments?

We thought that asking the sheriff to investigate would be a way to verify that people are innocent. Wouldn't that clear the air for any lingering questions from the public (like me)? It seems to us that the best interests of all stakeholders would include knowing the truth about what really happened at our old school building regarding water/boiler damage this winter.

Please reconsider your position.

Your request in the letter is unreasonable. That is my response.

You can disagree with how we went about maintaining an over 100 year old building. The implications that any of what has happened to the building was a result of malicious intent is patently absurd on its face.

We have explored our options with regard to facilities - purely in an informational way to understand the impact a facilities improvement project would have on our taxpayers. No plans have been made. We are trying to be proactive based on what would be best for the children of our district and the community as a whole. We need a thriving school to remain a strong community. Look at the improvements other districts of similar size have done over the past 20 years.

We have a great community here at Alta Aurelia, our job as a board is to look to the future and do our best to plan for the best interests of all stakeholders.

Perhaps having a conversation with us, coming to our meetings to hear what we consider, stopping in to visit Denny on your thoughts and concerns would be more productive than assuming bad intent of people that are spending their career as public servants.
