Thank you for the email with the attached document.

I have attached the requested communication between myself and Rasmussen's for the requested boiler work starting as of December 22nd. This came after more leaks in the boiler as it continued to fail, and verbal advice for the work to be done by Control Systems Specialist of Alta (later stated on an invoice dated December 29, 2023 from CSS).

My statement of May 13, 2024 which was read at the board meeting and then posted on our Facebook page is my final address, as noted in the statement, to anything in the flier unless I am directed otherwise by our Board of Education.

As far as the Sheriff's Office is concerned, I have spoken with the Sheriff and a Sheriff's Deputy, and they are aware that I would answer any further questions pertinent should they feel a need to investigate further.

While I cannot speak for our board members, I will not be attending any meeting your group chooses to conduct.

As already stated in two response emails to your repeated request for an outside structural engineer to tour the building, we have no need nor any desire for services that aren't sought out by the district to tour the property.

Thank you for your time.
